Popularisation of New Technique for operation of Cataract

3287. SHRI LAKKHI RAM AGARWAL: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) approximate number of persons lost their eye-sight during the last three years, year-wise due to faulty operations or non-operation of cataract;

(b) whether in a recently held All India Eye Specialists Conference, a new technique (Faco Emulcific treatment) has been discussed for operation of the disease; and

(c) whether Government propose to popularise the new technique for successful operation of the disease; and if not, reasons therefor;

THE MINISTER OF STATE OF THE MINISTRY OF LAW AND JUSTICE (SHRI RAMAKANT D. KHALAP): (a) No such data is maintained at the Central level.

(b) Yes, Sir.

(c) This technique is relatively difficult as compared to conventional cataract surgery and has a long learning curve for the surgeon. The recurring cost for maintaining the machine is also very high. This technique is not used at present for high volume srugery. It should be limited to those who demand early visual rehabilitation and can afford the cost in the hospitals where the phaco-emulsification technique has been established.
